

PLATINUM PLUS

An enchanting palace that combines contemporary elements with a fantastical ambience. Like a charming prince, this home will sweep you off your feet.

One of the home's most stunning features is the fireplace, a 20-foot-tall Carrara marble-clad structure with a distinct cut on the surround that gives it a modern flare. The stairwell, with intricate metal work, leads to a library — a tranquil space perfect for an escape.

With 20-foot ceilings, interior designer Susan Semmelmann was able to add crystals to the round light fixture that makes the chandelier a statement piece.

Directly off the great room is this dining area, which features an extended wood dining table with platinum leather and fabric chairs. The light fixture adds a touch of whimsy.

The pendant lighting above the cabinetry serves as both an additional lighting source and a distinct feature in the home's kitchen. The cabinets themselves have leaded glass doors, which pair perfectly with the kitchen's color palette.

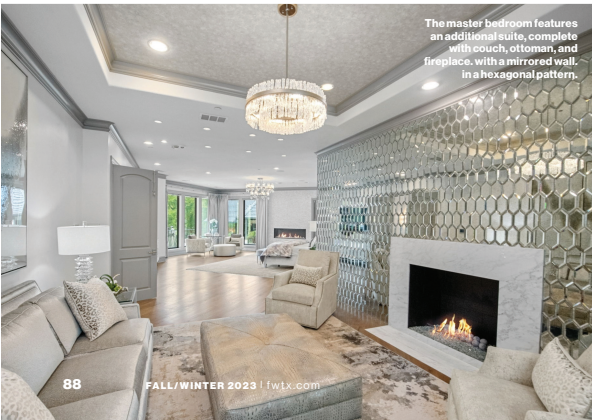

Sometimes it's best to let the outside in. This breakfast nook provides a panoramic view of the home's lush backyard, showing everything from the tennis courts to the swimming pool to a tree house.

The home's platinum palette continues into the master bathroom, which features mirrored walls and a bending bathtub. Crown-molding and cabinets that feature a deeper gray give the space a classic, livable feel.

The office's recessed ceiling is clad in wallpaper, ensuring every square inch is well designed. The lighting fixture, while eccentric in design, adds playfulness to an otherwise dark, serious room.

The master bedroom features an additional suite, complete with bench, ottoman, and fireplace, with a mirrored wall in a hexagonal pattern.

The home's showstopper is the grand bar, which features three smoked-glass pendant lighting fixtures. The nine barstools include black hair hide on the back and black and white leather on the inside.
